YOUR GUIDE TO
NATURAL **INTERIOR**
COATINGS.

WOOD THAT LASTS. In more than 100 years, a tree grows into solid quality. In more than 100 years of company history, Osmo has gathered experience in handling wood. Our attention to detail and expertise are devoted to the appropriate processing and long-term preservation of the valuable raw material wood.

COLOUR THAT PROTECTS. Only a finish that meets the needs of wood can preserve the natural beauty and durability of wood. More than 50 years ago, Osmo developed microporous wood finishes that are based on natural oils and waxes. With this the company has played a pioneering role in the field.

WOOD MEETS COLOUR

THE CONNECTION. Our passion for wood and coatings at Osmo flows directly into modern product development and research. To this day we are one of only few manufacturers who complete their value chain with coating systems developed and produced in-house.

Wood and colour from one source – a combination you can rely on.

THIS IS OSMO

NATURALLY OSMO. BECAUSE
EXPERIENCE ADDS WISDOM.

LASTING BEAUTY THANKS TO NATURAL OILS AND WAXES

Wood is an organic work material. Its cells can absorb and release moisture. To retain this ability, we have developed finishes perfectly geared towards the special properties of wood. Osmo finishes are based on natural oils and waxes. Oil penetrates the wood surface and protects the wood from inside. Wax forms an elastic, microporous surface and protects the wood from outside. The wood stays beautiful for a long time and the coating stays elastic.

NATURAL: HEALTHY LIVING

Good for people and good for wood: sunflower, soybean, linseed and thistle oils are the basis for our finishes. Our natural waxes are approved for the food industry; our pigments do not contain any harmful heavy metals. Dearomatised white spirit ensures that the finishes are easy to apply.

HIGH COVERAGE: BIG SAVINGS

Osmo finishes have an unusually high content of colour pigments and oils. Therefore they offer better coverage and deliver the desired results with as few as one or two coats, and no primer is needed. The bottom line: one can of Osmo finish coats much more square metres than a conventional finish. This saves time and money.

FAST: NO SANDING NEEDED

Forget the time-consuming sanding work. Osmo finishes can be easily renovated at any time. To do this, you do not even have to recoat the whole area.

Osmo finishes – You will notice the difference

FOUR GLOSS LEVELS –
AS INDIVIDUAL AS YOUR
PERSONAL REQUIREMENTS!

POLYX®-OIL ORIGINAL

Especially formulated for the needs of wooden flooring – for a low-maintenance surface that supports a healthy indoor climate!

- > Highly recommended for solid wood, plank, strip, OSB and cork flooring; also suitable for furniture surfaces and edge-glued panels
- > Polyx®-Oil Original is wear-resistant, water and dirt-repellent as well as durable and extremely hard-wearing.
- > Clear Polyx®-Oil Original enhances the wood colour; coloured Polyx®-Oil Original produces a transparent colour.
- > Number of coats: two coats on raw wood. For renovations, normally one thin coat applied to the clean and dry surface is sufficient – without sanding.
- > Can sizes: 0.375 L; 0.75 L; 2.50 L; 10.00 L; 25.00 L
- > 1 litre covers approx. 30 m² with 1 coat.

Also available with SOLAS certificate for shipbuilding upon request.

NATURALLY BEAUTIFUL.
WITH POLYX®-OIL ORIGINAL NATURAL

POLYX®-OIL ORIGINAL NATURAL

The renowned Polyx®-Oil for special effects!

- > Transparent, matt, for interior use
- > Highly recommended for solid wood, plank, strip, OSB and cork flooring; also for furniture surfaces and edge-glued panels
- > Polyx®-Oil Original Natural preserves the natural wood look.
- > Number of coats: apply max. one coat of Polyx®-Oil Original Natural to flooring. The second coat is to be carried out with a clear Osmo Polyx®-Oil.
- > Can sizes: 0.75 L; 2.50 L; 10.00 L
- > 1 litre covers approx. 30 m² with one coat.

Apply with:

3041 Natural
on Oak

3044 Raw
on Oak

Only suitable for light-coloured wood species!

POLYX®-OIL **ANTI-SLIP**

Ideal for interior wooden flooring that requires higher slip resistance!

- > Highly recommended for the protection of all wooden flooring and stairs that require higher slip resistance (commercial interiors), such as solid wood, plank, strip, OSB and cork flooring
- > Especially suited to theatre and stage flooring or catwalks
- > Two coats on raw wood. For renovations, normally one thin coat applied to the clean and dry surface is sufficient – without sanding.
- > Can sizes: 0.75 L; 2.50 L; 10.00 L
- > 1 litre covers approx. 24 m² with one coat.

Apply with:

WOOD PROTECTOR

Biocide-free wax impregnation - specifically for use in wet rooms!

- > Clear, for interior and exterior use
- > In indoor areas, highly recommended for use in wet rooms, such as bathrooms and kitchens; in outdoor areas, highly recommended for sandboxes and playground equipment
- > Wood Protector is extremely water-repellent and free of any organic biocides.
- > Number of coats: one coat is sufficient. A top coat with another product from the Osmo product range must be carried out within one week after application.
- > Can sizes: 0.75 L; 2.50 L
- > 1 litre covers approx. 8.4 m² with one coat.

Apply with:

4006 Clear

**Safe for
humans, animals
& plants**

(when dry)

**Suitable for
children's toys**

Tested acc. DIN EN 71.3;
resistant to saliva and
perspiration

**LESS SUSCEPTIBLE TO DIRT
AND STAINS!**

CONCRETE OIL

Makes concrete surfaces and unglazed tiles more stain-resistant!

- > Clear, satin, for the interior
- > Highly recommended for nearly all types of concrete (exposed concrete), artificial stone, screed as well as microporous natural stone
- > Greatly reduces dust resulting from screed and concrete surfaces.
- > Two coats on untreated substrates; for renovations, one coat applied to the clean and dry surface is sufficient.
- > Can sizes: 0.75 L; 2.50 L
- > 1 litre covers approx. 50 m² with one coat. Product coverage varies greatly depending on the absorption rate of the substrate. This can lead to significant deviations.

Apply with:

610 Clear Satin

LIFE IS TOO SHORT FOR THE
WRONG CARE!

ONLY THE BEST FOR WOOD

Further information about our products can be obtained from your local Osmo dealer or found in our Flooring brochure about the topics optimal protection, cleaning/care and renovation, and also online at www.osmo.com.

PAINT STRIPPER

Powerful, low-odour, universal paint stripper for solvent-resistant substrates. Dissolves and removes synthetic resin lacquers, 1-component lacquers, dispersion and latex paints, oil finishes and wood stains, dispersion glues, polymer plasters.

LIQUID WAX CLEANER

Clear or white transparent. For reviving dull flooring. Cleans and regenerates at the same time; provides the wood with natural hard waxes.

INTENSIVE CLEANER

Highly effective, slightly alkaline, specialised cleaner for removing organic and inorganic deposits on oiled and waxed surfaces as an alternative to sanding.

SPRAY CLEANER

Clear. For cleaning oiled and waxed furniture surfaces and kitchen worktops. Cleans without damaging the protective oil-wax surface.

WOOD FILLER

Perfect for patching small cracks and joints in wood. Available in the colours White, Beech, Spruce/Pine, Mahogany, Oak and Black.

POLYX®-OIL CARE AND REPAIR PASTE

Thick, clear, oil-wax combination for repairing small damages in all wood surfaces treated with Polyx®-Oil, such as furniture surfaces, worktops and wooden flooring.

WASH AND CARE

Cleaning and care concentrate for routine wet cleaning. Especially developed for wooden flooring treated with an Osmo Polyx®-Oil.

TANNIN SPOT REMOVER

Specialised cleaner for removing black tannin stains and spots on untreated or oiled wood surfaces in indoor areas.

MAINTENANCE KIT FOR FLOORS

Osmo Maintenance Kit for Floors is ideal for the cleaning and care of wooden flooring. The kit contains 1 litre Wash and Care, 0.5 l Liquid Wax Cleaner as well as 3 applicator clothes.

MAINTENANCE KIT FOR STAIRS

Osmo Maintenance Kit for Stairs is ideal for cleaning and refreshing as well as maintaining wooden stairs. The kit contains 0.25 l Wash and Care, 0.2 l Maintenance Oil, 2 applicator clothes and a polishing pad.

TOPOIL SURFACE KIT

Ideal for the protection of furniture and worktop surfaces made of wood. The kit contains 0.50 l TopOil 3058, 0.50 l Spray Cleaner, one Hand Pad Holder, 2 Oil Finish Applicator Fleeces and one buffing fleece.

WOOD PUTTY

For filling small joints (< 2mm) and small damages (e.g. screw holes) in wood flooring and parquet. Universal application for all wood species.

LIQUID WAX REFRESHER

Especially designed for the occasional refreshing and maintenance of wooden flooring that has been oiled and waxed with a solvent-free product.

CLEANING KIT FOR FLOORS

For the maintenance and care of wood, synthetic, tiled and natural stone floors. Contains basic mop head plate with connector for Osmo System Telescopic Handle, Dust-Mop, Micro Mop Plush and Active Fibre Cloth.

EASY PADS

Specialised cloths for cleaning and maintaining oiled and waxed wood surfaces. Also suitable for an even application of Osmo Wood Wax Finish.

FLAT BRUSH

Available in the widths: 25, 50, 60, 80 and 100 mm. Suitable for the application of all finishes from Osmo.

ROLLER AND BRUSH SET

For the manual application of all Osmo coatings. Contains roller tray with ridged area, disposable tray inserts (3 pieces), Microfibre Roller (100 mm wide), roller frame with connector for Osmo System Telescopic Handle, Flat Brush (60 mm).

FLOOR ROLLER SET

For the manual application of all hardwax-oils. Contains roller tray with ridged area, disposable tray inserts (3 pieces), Microfibre Roller (250 mm wide) and roller frame with connector for Osmo System Telescopic Handle.

RUBBER SCRAPER

Available in 220 mm or 350 mm widths. Ideal for the two-tone technique.

FLOOR BRUSH WITH HANDLE

Thanks to the ergonomic handle and connector for Osmo System Telescopic Handle, it is suitable for the manual application of Polyx®-Oil and Wood Wax Finish. Available in the widths 220 and 400 mm.

SYSTEM TELESCOPIC HANDLE

High quality aluminium Telescopic Handle with SoftTouch grip and Quick Connect technology. Adjustable length: 120-200 cm.

PAD HOLDER WITH JOINT

For the manual application of base coat wood finishes from Osmo and for the intensive cleaning of edges and corners. Includes connector for Osmo System Telescopic Handle.

HAND PAD HOLDER

With Superpads, ideal for the manual application of base coat wood finishes from Osmo. With Finish Applicator Fleece, ideal for the application of all Polyx®-Oil and TopOil variations.

OIL FINISH APPLICATION SET

For the simple and optimal application of all Osmo wood finishes on smooth subsurfaces. Set contains one Hand Pad Holder, two Finish Applicator Fleece, roller tray 22 x 20 cm and three tray inserts.

FLOORXCENTER

User-friendly single disc machine for cleaning, refreshing, maintaining and colouring oiled floors. Ideal for large areas and for the machine maintenance of your wooden flooring.

HANDXCENTER

For the simple and optimal refreshing or staining of furniture surfaces, stairs and worktops with oil-based coatings.

DECKING AND FLOORING CLEANING MACHINE

Suitable for interior and exterior use. Loosens and removes dirt in one clean work step. Ask your local dealer!

⊕ Tools can be used with Osmo System Telescopic Handel.

GET CREATIVE –
SIMPLY MIX YOUR OWN COLOURS!

YOUR CHOICE OF COLOURS

Your creativity does not know any limits? Then our finishes are your perfect companion: with Osmo Wood Wax Finish, you bring out the best in wood surfaces in the home. Simply mix the colour of your choice. No matter what you are planning – with Osmo, you will always make the right mixture. Within one product family, you can mix colours as you please. Good results are achieved with one of these three techniques:

TONE IT DOWN

Bring a touch of Scandinavia in your home: take a colour of your choice and mix it with a lighter colour, such as white. The result is a softer, pastel tone for a cosy, relaxing bedroom or a garden with flair.

REMIX IT

The colour you are looking for is not available as a finished product? No problem: maybe it is in our selection of mixtures. Just mix the colour tones as described in the instructions and apply to the desired surface. Want to try something new? Great idea. First try out a small amount– order a sample sachet.

STIR IT UP

Looking for a special effect for furniture or panelling made of wood? Then the two-tone technique is just the thing for you: apply one colour to a textured wood surface and once it is completely dried, apply a second colour. Pull a squeegee over the surface while it is still wet. On the raised areas, the first colour will reappear and the second will stay in the grooves of the wood. This really makes the wood grain stand out.

TONE IT DOWN

3138/10 g Mahogany

Colour Mix

3101/10 g Clear
3164/10 g Oak

DESIGN WOOD WITH THE GRAIN

Here's a special effect for you to try: combine two colours on a textured surface. The more texture the wood has, the livelier the surface will be. This two-tone technique brings a dramatic change to furniture, doors or panelling and adds bold accents. If you love the unusual, then give it a try.

	+		=	
Colour 3105 Yellow		Colour 3125 Blue		Colour Results
