

Full declaration of ingredients

Hardener Polyx Oil Express

Solvent:

- Methoxy propyl acetate,

Hardener

- Hexamethylen-1,6-diisocyanat homopolymer

Contains isocyanates. Follow the manufacturer's instructions. When handling, observe the technical rules for hazardous substances TRGS 430 "Isocyanate risk assessment and protective measures". In the workplace, isocyanates can mainly enter the body through the respiratory tract, but also through the skin. When inhaling vapours or spray mist, there is a risk of sensitization. When handling isocyanate-containing paints, carefully observe all measures for solvent-based paints. In particular, do not inhale spray mist and vapours. Allergy sufferers, asthmatics and persons prone to respiratory diseases are not allowed to work with isocyanate-containing paints.

Further information, e.g. for the technical characteristics, please refer to the product information.
