

WASH AND CARE

Highly effective special cleaning concentrate with natural ingredients - for regular cleaning and care!

8016 Clear

Product description:

Water-soluble concentrate for everyday cleaning and care – especially developed for oiled and waxed wooden floors. It contains soaps based on natural oils. The wood will not dry from cleaning. When used regularly, highly effective Osmo Wash and Care produces a low-maintenance, non-slip surface. The water-soluble ingredients reduce streaking and will not form a layer. Especially mild on skin, free of dyes and fragrances, biodegradable, free of solvents and emissions, and thus it supports a healthy living environment.

Recommended use:

Osmo Wash and Care is especially suitable for the cleaning and care of oiled and waxed wooden flooring. It is also recommended for furniture, doors, wall and ceiling panelling.

Ingredients:

Based on natural plant oils; 5-15% plant soaps (anionic tensides); <5% non-ionic tensides; care components, suspending agent. Detailed declaration of ingredients available upon request.

Technical data:

Specific weight: 1.01-1.03 g/cm³

Odour: faint/mild, odourless after drying

Flashpoint: not required

pH value: 10.9

Storage:

5 years or longer if stored in the originally closed

container. Do not expose to frost or temperatures above 30 °C!

Surface preparation:

To remove loose debris, we recommend using Osmo Dust-Mop, a conventional vacuum cleaner or broom.

Methods of Application:

Manual application: Wash and Care is ideally used with Osmo Micro-Mop Plush. To removing everyday dirt, add approx. 1 capful (15 ml) of Wash and Care per 2 litres of water. Clean the floor with a damp mop (not wet!). Correct dosage saves money and is gentle on the environment. In comparison to conventional (non-concentrated) products, only a small quantity of product is needed. Do not mix with other cleaners!

Machine application: Distribute the diluted Wash and Care solution with a pump sprayer on the floor. Loosen dirt deposits with a single disc machine, e.g. Osmo FloorXcenter, and a white pad. Wipe up loosed dirt deposits immediately or remove these directly with a Microfibre Pad for single disc machines.

Re-oiling: To re-oil high traffic and contaminated areas, first clean intensively with Wash and Care (increase dosage to max. 1:1). Strong machine applications (e.g. single disc machine with a red pad) also remove the soluble wax and oil layer. After drying, one thin coat of an Osmo Polyx®-Oil must be applied to flooring.

Cleaning of tools:

With water.

Drying time:

Approx. 3-5 hours (normal climatic conditions, 20-23°C/ 50-65% rel. humidity). Ventilate well while drying. Lower temperatures and/or higher air humidity may increase drying times significantly.

Coverage:

Approx. 15 ml Wash and Care per 2 litres water. For higher levels of contamination or for mechanical applications, the dosage can be increased up to a mixing ratio of 1:1.

Note:

For on-the-spot stain removal and the occasional intensive restoration of waxed or oiled floors, we recommend using our renowned Osmo Liquid Wax Cleaner, which is based on natural plant oils and waxes (undiluted application with Osmo Active Fibre Cloth). For a complete renovation, we recommend applying an Osmo Polyx®-Oil.

Caution:

Keep out of reach of children. Contains 5-15% anionic tensides, < 5% non-ionic tensides .

Disposal:

Dispose of product residuals according to the official guidelines (European Waste Code (EWC)-Code 20

01 30). Only completely emptied cans can be recycled.

Colour tone:

8016 Clear

Size:

1.0 l; 5.0 l; 10 l
